R Y EXTRUSION

R Y EXTRUSION

Backed by more than two decades of industry experience; we manufacture and supply high quality aluminium alloy sections for industrial, architectural and commercial use. We operate a three million dollar facility located in Ambernath (E) and are the closest aluminium extrusion plant to both Mumbai market and as well as Mumbai port.

We currently manufacture all profiles of 6063 T4, 6063 T5, 6063 T6, and EC alloys ranging from 5mm to 125mm cross sectional diameter. We cater to railways, pharmaceutical, architectural, electrical and HVAC industries.

VISION

“कर्मण्येवाधिकारस्ते मा फलेषु कदाचन”

Karmanye Vadhikaraste, Ma phaleshu kadachana

You have the right to work only but never to its fruits

By 2017, we aim to become the market leader of industrial and commercial aluminium sections in Maharashtra market while delivering quality products at competitive rates.

By 2020, we intend to form an integrated aluminium trading platform that can be used by both manufacturers and customers as an efficient and transparent marketplace to trade aluminium finished goods.

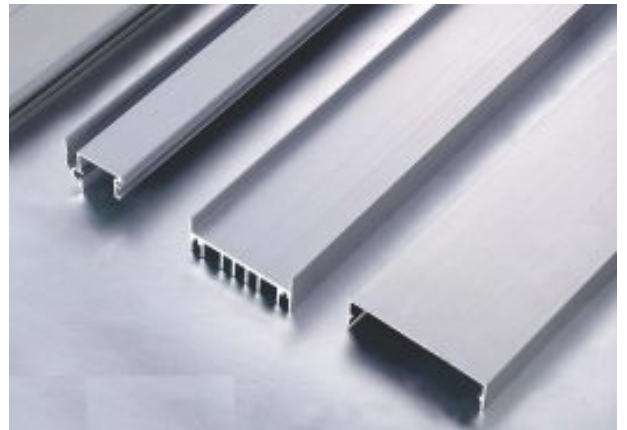

COMPANY PROFILE

Proud to MAKE in INDIA: R.Y Extrusion Pvt. Ltd. was established in the year 2012. We manufacture all profiles of 6063 T4, T5, T6 and electrical grade alloys ranging from 5mm to 125mm cross sectional diameter and serve both domestic and international markets. We currently manufacture profiles for heat fins, HVAC, pharmaceutical high pressure rooms, architectural facade, ladder sections as well as door and window architectural sections.

We strive to offer the best customer service by following three fundamental principles

- **BEST QUALITY**
- **SHORT TURNAROUND TIME**
- **ECONOMICAL RATES**

■ BEST QUALITY

Best QUALITY: We deploy best in class control systems to create a “Quality Ecosystem” while employing a first in industry data collection system to monitor quality of each extrusion from scrap to finish. We utilize

- Imported scrap to reduce extrusion lines
- Spectrometer to test alloy composition for flawless anodizing
- Fully automated press and puller to minimize grain distortion
- Temperature resistant handling system to reduce surface scratches
- Quality controlled automated packing to enable breakage free shipping
- Accurate weight measurement to ensure absolute fairness

■ SHORT TURNAROUND TIME

Short Turnaround Time: We have one of the shortest dead-cycle time in the industry allowing us to produce finished goods at break neck speed. Furthermore, the central location of our plant allows us to deliver to both domestic and international markets faster than anyone else.

- **Domestic Market:** Located 40 kilometers away from South Bombay and Navi Mumbai, we enjoy excellent road connectivity to country 's commercial capital
- **Export:** We possess export license and are the closest extrusion plant to JNPT
- **Quality Die Room:** Fully equipped die-room complete with Spanish made AJAX milling machines, allows us to quickly rectify die issues and maintain customer specifications.

■ ECONOMICAL RATES

Economical Rates: Having an automated plant, seamless connectivity to local markets, a quality management system in place to reduce wastage we are able to offer extremely competitive market rates.

OUR SERVICES

- **Design And Planning** – We have partnered with a leading UK design firm to manufacture high quality dyes of industrial strength
- **Dye Correction Workshop** – We use experienced dye correctors to achieve customer specification
- **Extrusion** – We can provide all industrial and commercial sections between diametrical section lengths of 5mm to 125mm
- **Anodizing and Polishing** - We have in-house buffing and anodizing, allowing us to provide end to end service
- **Powder Coating** - We provide a wide variety of color choices and additional properties such as anti-bacterial, anti-static and heat-resistant coats
- **Lab Reports** - We offer the choice to our customers to procure an alloy-test report to guarantee metal composition.
- **Logistics** - At an additional rate, we offer our customers the choice to utilize R.Y. Extrusion logistics to ensure door delivery.

COMMITMENT

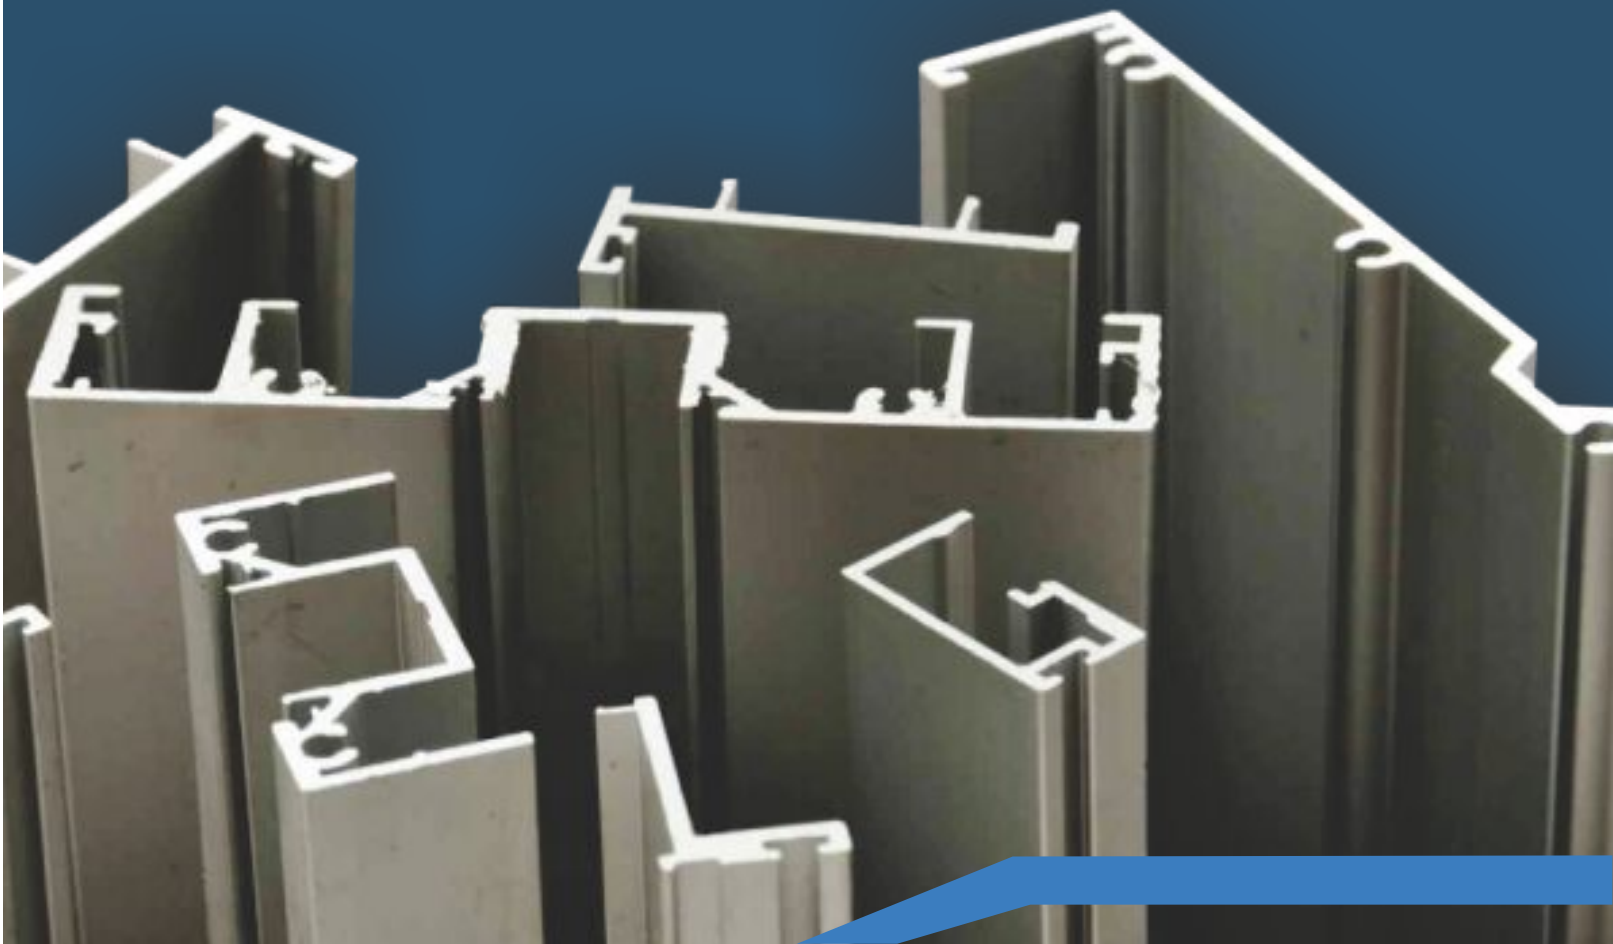

Quality, Quality, Quality and everything that is needed to ensure Quality

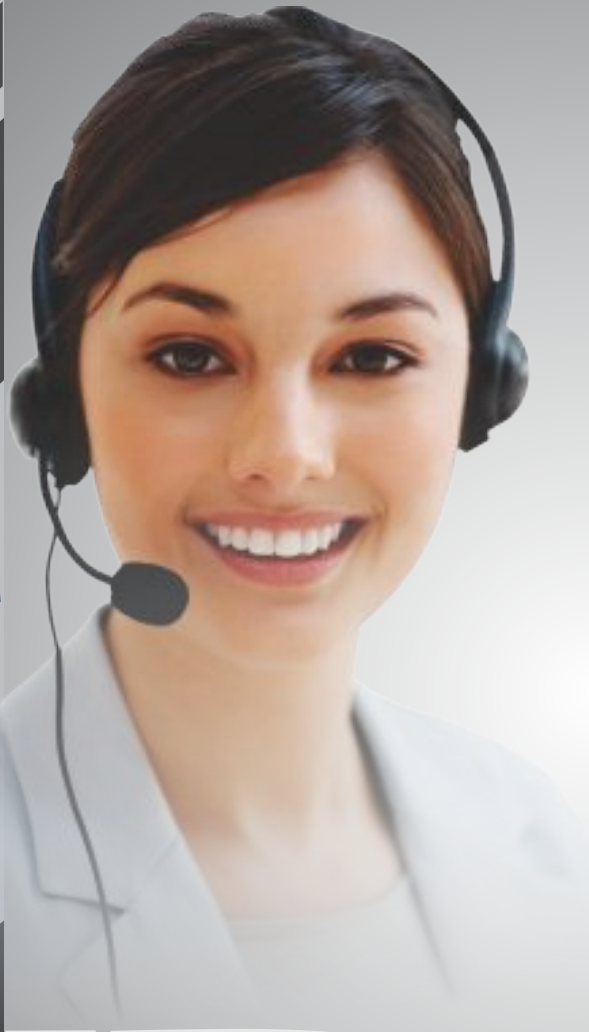

- We are committed to utilize all tools to deliver high quality profiles
- We are committed to honor our delivery times and rates provided

Our goal is to provide defect free, high-quality goods delivered in a timely fashion at an economical rate. We promise to work with our customers to resolve all queries, through honest and prompt response and establishing enriching life-time business relationships.

Why R.Y. Extrusion Pvt. Ltd. ?

- Higher quality products
- Lead time starting from a couple of days for express orders
- Economical Rates
- Customer friendly approach
- Proximity to Mumbai market and sea-port
